CHUBB®

Chubb's Cyber Service Solutions

As a Chubb policyholder, adding cyber insurance coverage will give you access to a wide selection of tools and services designed to help reduce exposure, respond to threats, and protect your business. No matter the size of your organization, you can **choose to customize the services to fit your needs**. Explore our cyber solutions and discover how you can unlock complimentary or preferred pricing services. Get started today by **browsing our offerings and requesting access** or **schedule a consultation** with one of our expert cyber risk advisors to learn more.

Cyber Stack for Small Businesses

Specifically designed for small businesses of 100 employees or less, Chubb offers a robust collection of loss mitigation services, available as a complimentary offering for the first full year, with a cost savings benefit of up to $28,000:

- **DEDICATED CYBER RISK ADVISOR**
- **ATTACK SURFACE MANAGEMENT**
- **THREAT INTELLIGENCE OUTREACH**
- **VULNERABILITY SECURITY ALERTS**
- **CYBER SECURITY AWARENESS TRAINING**
- **PASSWORD MANAGEMENT**
- **INCIDENT RESPONSE**

Incident Response Solutions

Knowing when and how to respond to a cyber incident can make all the difference. Plan and practice your response before an incident occurs — and ensure quick action if it does.

BREACH RESPONSE PLAN BUILDER: Utilize a customizable, pre-written data breach response plan accessible 24/7 online or via a mobile app. Enjoy a 30-day free trial. ©

RESPONSE READINESS ASSESSMENT: Identify gaps in your organization's incident response plan with a customized evaluation or receive guidance on creating an incident response plan.

VIRTUAL INCIDENT RESPONSE TABLETOP EXERCISE: Test your cyber response plan for weaknesses with our interactive simulation, featuring a custom-tailored scenario based on current threats.

INCIDENT RESPONSE MOBILE APP: Get 24/7 incident reporting and response service resources at your fingertips. ©

RECOVERY SOLUTIONS: Protect critical applications and websites with solutions that ensure seamless transaction replications across multi-cloud environments.

Threat Intelligence Outreach

Our Cyber Threat Intelligence Team has a curated collection of actively exploited threats leading to cyber claims (collection represents less than 1% of the known software vulnerabilities in existence). If a potential threat is detected in your environment during routine monitoring and scanning, you and your broker are promptly notified with guidance on how to remediate the threat to prevent it from spreading and becoming a serious issue. ©

Complimentary Chubb-Managed Services — No Registration Required

Vulnerability Management Solutions

Help keep track of and address common software vulnerabilities and misconfigurations that can leave your organization exploited.

THIRD-PARTY VULNERABILITY ALERT SYSTEM: Stay informed on potential threats with biweekly alerts on newly identified vulnerabilities in your software and take action to protect your organization.

EXTERNAL VULNERABILITY MONITORING: Monitor cyber risk as a daily measurement of your security performance via a platform that highlights strengths and potential weaknesses.

NETWORK VULNERABILITY SCAN & CONSULTING: Receive a comprehensive vulnerability scan for 6,000+ hacker vulnerabilities, with hands-on guidance from a cybersecurity consultant.

PENETRATION TESTING, ATTACK SURFACE MANAGEMENT, AND BREACH & ATTACK SIMULATION: Identify and prioritize vulnerabilities, misconfigurations, shadow infrastructure, and other exposures with expert penetration testing.

AUTONOMOUS ENDPOINT MANAGEMENT PLATFORM: Utilize a single, autonomous platform that provides real-time visibility, control, and remediation of your IT estate.

SECURITY RATINGS PLATFORM: Gain insights into your security ratings and identify your external attack surface to mitigate vulnerabilities and protect your business from potential risks.

CHUBB®
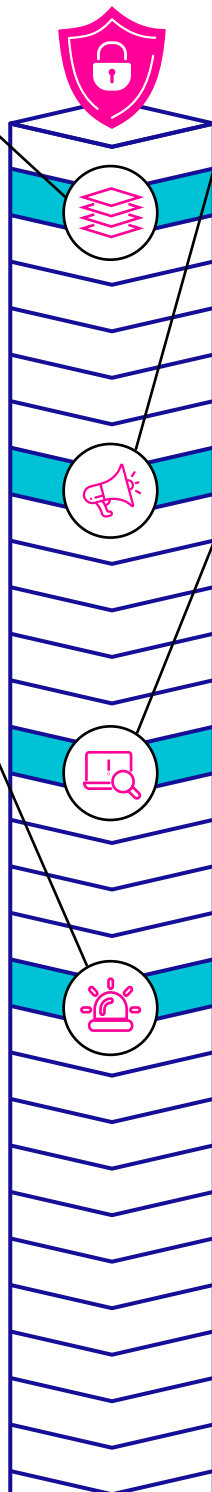

Endpoint Cyber Security Solutions

Access solutions that stop cybercriminals and their advanced attacks from entering and spreading through your organization's networks.

ENDPOINT SECURITY & RESPONSE: Get access to 24/7 anti-virus software that helps provide protection to your computer network and the vulnerable entry points.

EXTENDED DETECTION & RESPONSE: Get access to software that encompasses AI-powered prevention, detection, response, and threat hunting across user endpoints, containers, cloud workloads, and IoT devices.

Managed Detection & Response

Implement a security solution that helps monitor, detect, analyze, and respond to cyber threats.

Privacy Risk Management Solutions

Customer privacy and trust are crucial. With access to privacy and regulatory compliance assessments, you'll get an essential tool in managing potential risks.
